The HAMILTON Retail Remote Transaction Systems

With Hamilton's **Model HA-1000**, installation and maintenance costs are often reduced because its powerful air turbine is located inside the unit itself. A versatile and powerful performer since 1984, the HA-1000 has become an industry standard for drive-up banking.

The **Model HA-45** with the smallest foot print (less than 90 square inches) allows narrow islands and can be placed next to the building.

Both HA-1000 and HA-45 are industry standard 4.5" tube systems and feature low-maintenance stainless steel and polymer coated finishes. They have one button operation, provide clear audio communication and can be equipped with optional Tell-R-TV, two-way video.

The Hamilton HA-1000 is available as either an upsend or a downsend unit.

The Hamilton HA-45 is available as an upsend unit only.

The HAMILTON Commercial Remote Transaction Systems

Model HA 33 is Hamilton's powerful 10" system, handles the most demanding commercial deposits moving scores of rolled coin, paperwork and even night deposits

- Huge carrier capacity – up to 500 cubic inches
- Easy-to-use captive carrier
- "One-touch" operation
- Low-maintenance, stainless steel construction

Model HA-47

is a unique 4" x 7" system that easily handles both commercial and retail customer transactions

- Carrier lies flat, opens square and easily accepts documents, cash and coin
- One-touch operation
- Low-maintenance stainless steel and polymer finishes
- "Tell-R-TV" Two-way video option
- Convenient front maintenance access
- does not disturb traffic in other lanes

The HAMILTON Windows And Deal Drawers

Drive-Up Window

- UL rated both frame and glass
- Available in sizes from 3' x 5' to 3' x 15'
- Bullet resistive glass
- Stainless steel construction inside and out

DCD-18 Deal Drawer

- Extra large 12" x 15" delivery platform that is 18" deep
- Bullet resistive
- Heater option for more comfort during cold weather

Model 400DD Deal Drawer

- Smooth manual or electric operation
- Rated U.L. Level 3 to resist .44 magnum attack
- Available for new installation and retrofits

The HAMILTON Audio & Video Communications Systems

Model 5450 Video Console along with Model 5001 Series Audio Console

Combined units afford superb audio and visual communications to put customers at ease in remote transaction situations.

- Large LCD video display
- Integrated audio and video
- Control communications for up to 12 drive-up lanes

Model 5092 Lightweight Wireless Headset

- Hands-free communication
- Provides communication even when the teller must move out of the customer's line of site
- Slim and lightweight

Tell-R-TV Retrofits

Existing HA-1000 installations can be easily retrofitted with a video Tell-R-TV package. Choose between 6.5" and 10" LCD screens. The 10" model has a special high-intensity "sun-viewable" LCD screen.
